

# 2018

# Calendar of Events

## MAY 15, 2018

**Drs. Sheena Howell  
and Erick Sato**  
"Endodontic Solutions,  
A Modern Standard of Care for  
Long-Term Success"

*During this course, we will review Endo diagnosis and the appropriate treatment. A step by step approach for treatment of cracked teeth as well as treatment for teeth with vertical fractures. You will also learn how to incorporate Cone Beam CT into your practice when diagnosing endodontic cases.*

## JUNE 19, 2018

### HAYES

**Mr. Steve White and  
Joe Hayes**  
"HIPAA & OSHA  
Compliance: What You Need  
to Know Today for Your  
Practice"

*In this seminar, we will review what is needed for your dental practice to become and remain HIPAA and OSHA compliant. We will also discuss how to implement privacy and security protections and explain what is new and upcoming.*

## JULY 10, 2018

**Dr. Bruno Arnaud**

"Challenging the Status Quo to Optimize your  
Aesthetic Outcome"

*There has been an evolution of implant designs, connections and surface treatments. This lecture will discuss the emphasis on the platform switch concept incorporating the innovation of the Morse taper connection with its many benefits, including the prevention of screw loosening. We will also learn how to focus on the relationship between biologic width and bone loss and how it affects tissue integrity.*

## AUGUST 21, 2018

**Ms. Erica Zerante**

"3D Printing—  
A Practical Solution for General Dentistry"

*During this lecture, we will discuss the pros and cons of dental relevant 3D-printing technologies and the practical applications for the general dentist's workflow. You will be presented with a review of the economics of 3D printing to ensure that the technology contributes to overall office productivity. You will also learn the procedures that allow you to achieve reliable, high quality printed appliances.*

## SEPTEMBER 18, 2018

**Dr. Mark Montana**

"Restoring Function and  
Esthetics with Dental Implants"

*This presentation is appropriate for the dentist who is interested in gaining comprehensive training and knowledge in restoring dental implants. The emphasis of the presentation will be on practical treatment solutions to meet everyday challenges. The discussion will also include treatment planning and basic to advanced prosthetic principles and techniques.*

## OCTOBER 16, 2018

**Dr. Weston Spencer**

"Advances in Digital  
Dentistry"

*Digital dentistry is changing the way general dentist, surgeons and laboratory technicians interact with one another and plan treatment. This lecture will review recent advances in digital technology including how to incorporate these advances as part of the treatment plan. You will have a better understanding of the materials and processes available for CAD/CAM restorations as well as how digital impressions can help create an accurate final impression.*

*Please join  
Mission Valley DMS for our  
thirteenth year of complimentary  
instructional programs.  
It's our pleasure to have  
you partake in these sessions  
which provide exceptional  
learning opportunities to you,  
your staff and lab technicians.*

Location: Scripps Mercy Hospital  
West Auditorium
